Model: 200.2

Condition: Remanufactured

Price: \$55,000

Availability: In Stock

Warranty/Installation: Yes

Location: Beaverton, OR USA

Inquiry: 503 616 4710

OMNIPROBE System Features

The Omniprobe liftout system is the premier TEM membrane lifting solution in the industry. With fine motor from the piezo motors on the Omniprobe micromanipulator, one can easily remove a TEM sample or use the manipulator for other nanomaterials investigations.

This Omniprobe is used and tested. Fully functional and includes all the necessary components to make it work on your FIB-SEM.
